

**REMARKS/ARGUMENTS**

Favorable reconsideration of this application, as presently amended and in light of the following discussion, is respectfully requested.

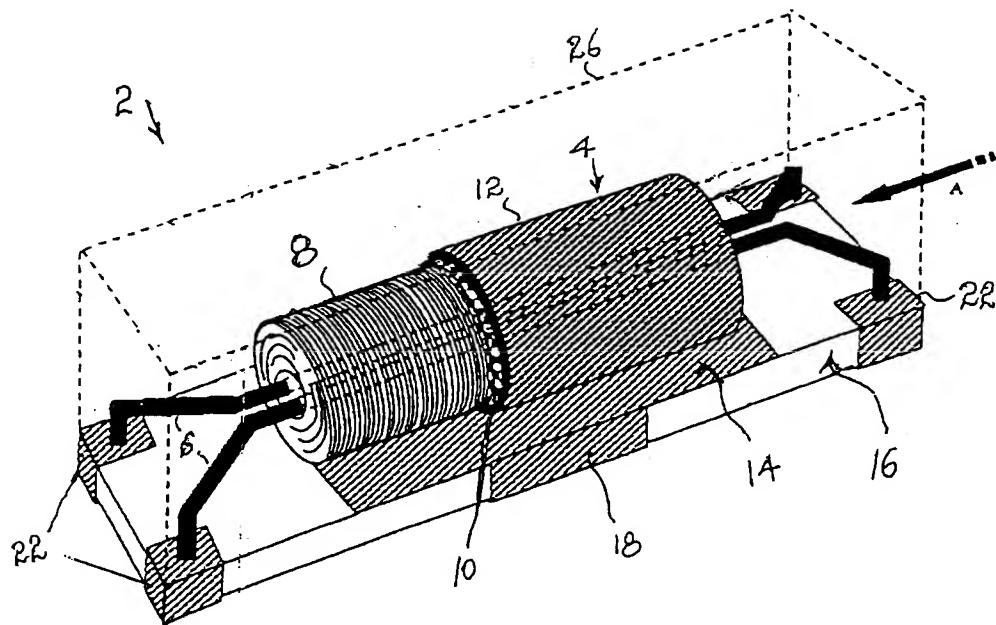

Claims 18-20 and 30 are presently active in this case. Claims 21-29 and 31-34 are withdrawn from consideration. Claims 18, 27, and 30-32 have been presently amended. No new matter has been added.

In the Office Action, Claims 18-20 and 30 were rejected under 35 U.S.C. § 103(a) as being unpatentable over Nir et al (U.S. Pat. Appl. Publ. No. 2003/0210104).

Applicants acknowledge with appreciation the courtesy of Examiner Nguyen to interview this case on October 3, 2007 during which time the issues in the outstanding Office Action were discussed as substantially summarized hereinafter.

**Regarding the rejection over Nir et al,** Claim 18 has been amended to more positively recite the elements therein. Claim 18 defines an electronic device comprising magnetic screening wire having a peak of resonant magnetic losses. The magnetic screening wire includes at least one assembly of magnetic filaments and at least one inductive winding having at least one segment of metallic wire wound around the at least one assembly of magnetic filaments. As noted on the Interview Summary Sheet, these changes overcome Nir et al.

In particular, as discussed during the interview, the wire 6 in Nir et al is disposed inside the lossy magnetic material 8, as shown in Nir et al's Figure 2 reproduced below.

Nir et al do not disclose or suggest a segment of metallic wire wound around an assembly of magnetic filaments, as defined in Claim 18.

M.P.E.P. § 2143.03 states that, to establish *prima facie* obviousness, all claim limitations must be taught or suggested by the prior art. With no teaching or suggestion in Nir et al for the above noted feature, it is respectfully submitted that Claim 18 (and the claims dependent therefrom including the withdrawn claims) patentably define over the art of record and should be passed to allowance.

Application No. 10/528,177  
Reply to Office Action of August 2, 2007

**Conclusion**, in view of the present amendment and in light of the above discussions, the outstanding grounds for rejection are believed to have been overcome. The application as amended herewith is believed to be in condition for formal allowance. An early and favorable action to that effect is respectfully requested.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,  
MAIER & NEUSTADT, P.C.
